# Emergency Response

## PLAN FOR THE UNEXPECTED

When a hurricane or tornado hits certain areas, the local fuel supply may be cut off or become limited. This can cause fuel prices to skyrocket while lines grow at retail gas stations.

If your organization depends on keeping vehicles or stationary generators operating, you can rely on Mansfield Emergency Response Program to provide the fuel you need.

Mansfield's extensive network of 1,500 carriers and over 1,000 fuel supply points allow us to quickly jump into action amid an emergency and keep you up and running.

## LOWER YOUR BUSINESS RISK

No different than protecting your business assets via insurance, you want to protect your company's ability to operate, service your customers, and generate revenue by getting an insurance policy on your fuel.

Whether you need backyard, mobile, or generator fueling for your facilities or vehicles, Mansfield's extensive delivery network and fuel supply points will ensure you receive the fuel you need to keep your business running efficiently.

## FLEXIBLE PROGRAM

Mansfield's Emergency Response program offers flexible components, allowing you to design the program according to your needs.

The program can include temporary fuel storage tanks, dedicated fuel trucks and supplies, retail fleet cards, and proactive tank and generator maintenance.

## PRESCRIPTIVE SOLUTION

For organizations with little margin for downtime, the Mansfield Emergency Response program guarantees your business keeps running smoothly when the unexpected happens.

- ✓ Dedicated fueling trucks: ensure uninterrupted operations with dedicated trucks to fuel your vehicles and tanks.
- ✓ Dedicated fuel supply: bypass the long lines at retail stations and set up local fuel storage.
- ✓ Best in class execution: Mansfield's sixty-five years of experience have taught us how to best respond in a crisis.

## GET STARTED

You can count on Mansfield to design the right Emergency Response Fuel Program for you. Our team of energy experts will perform a fueling needs consultation to design a best practice program to ensure business continuity during an emergency event.
