LTL FUEL

LEADING FLEETS RELY ON MANSFIELD

Managing multiple fuel vendors requires time and energy that could be spent on your business. Even worse, it makes it much harder to be strategic and get ahead.

Now you can get on top of your fuel program, with a single fuel provider across the US and Canada.

Whether you need fuel delivered to a small tank, a generator, a reefer, or directly to your equipment, Mansfield can help you consolidate your fuel program, saving you time and money.

TRANSPARENT PRICING

Do you know whether your fuel prices are competitive? Have you audited your invoices for contract compliance?

Mansfield prices customers using third-party indexes, so you know you're getting a fair price every day. Every delivery flows through Mansfield's smart contract system, which has saved customers an average of over 1% on their annual fuel expenditures – and sometimes much more.

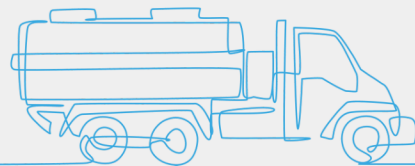

KEEP YOUR EQUIPMENT FULL

Whether you have a bulk fuel tank, reefer unit, or a fuel-powered generator, Mansfield delivers what you need – where and when you need it, ensuring you never run out of mission-critical fuel.

BENEFITS OF CONSOLIDATING

When you consolidate your entire fuel program with one supplier, you get significant advantages.

- ✓ Save time on vendor management, so you can focus on your business.
- ✓ Centralize reporting with FuelNet so you can see where every drop of fuel goes.
- ✓ Invest in strategic initiatives such as risk reduction, sustainability, labor cost savings, data mining, and more.

Learn how we can help you optimize your entire fuel system.
