

BENEFITS

- ✓ Fleet operators can continue leveraging the convenience of fleet cards while also addressing carbon emissions
- ✓ Removes the constraints of low-carbon fuel availability and accelerates positive climate impact
- ✓ Easy-to-implement, practical solution linked directly to fuel quantities – it's carbon management without the guess work
- ✓ Voluntary carbon credits issued from science-backed, high integrity portfolios from a partner you trust
- ✓ All-in-one price structure with fixed carbon credit costs

CARBON-ACCOUNTED FLEET CARD PROGRAM

With an increasing focus on reducing road transportation emissions, businesses are seeking ways to reduce their environmental footprint. One effective way to do this is through the implementation of Mansfield's carbon-accounted fleet card program.

Our program not only helps customers track and manage their fuel expenses, but also calculates and compensates the carbon emissions associated with the fueling of their fleet.

By participating in Mansfield's carbon-accounted fleet card program, fleets can demonstrate their commitment to sustainability without disrupting operations.

Tackle Fuel Emissions Without Disrupting Operations

HOW DOES IT WORK?

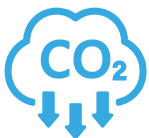

- ✓ Request an analysis of your fuel emissions attributed to your current fleet card program
- ✓ Select your Carbon Mitigation Impact Tier (1,2,3)
- ✓ Choose the percentage of emissions for which you would like to compensate (25%, 50%, 100%)
- ✓ Set and forget – receive monthly Certificates of Voluntary Carbon Action that identify what projects you invested in and your climate impact

MANSFIELD FLEET CARD

Mansfield Fleet Cards are an effective fuel management solution for fleets of any size. With a Mansfield Fleet Card, you have total insight into detailed driver and vehicle-level trends to help you determine how your drivers should fuel. Plus, all fueling transaction data can be integrated into your fuel management system for a holistic view across your complete fueling program. More control and lower overall fuel spend.

CARBON-MITIGATION IMPACT TIERS

Each tier includes a portfolio of **high integrity carbon projects**.
