IN THE NEWS

Cold Forecasts Raise Natural Gas Prices to \$4.6

Natural gas is up today, hitting a high of \$4.6275/MMBtu after weather forecasts indicated that a colder December was on the way, and weather is proving to be the driving force in gas prices for now. The weather forecast is driving gas prices slightly higher, but there are concerns about Thursday's EIA storage report and what it could mean for natural gas values. Throughout much of the year, there has been an overabundance of natural gas in storage with little demand from the warm weather...

Natural Gas Continues to Consolidate

Natural gas markets have drifted a little bit lower during the trading session on Thursday in the early hours, but we still find a lot of noise in this market. At this juncture, it looks like we are consolidating between the \$4.70 level and the \$4.20 level. That is not a huge surprise. A 50-cent range is not overly rare in this market; it is pretty typical. What is concerning is the fact that it had jumped 30% and then kept going as we rolled over into the December contract...

ICC slashes Nicor, Ameren gas rate hikes by over 40%

The Illinois Commerce Commission Wednesday sharply cut rate increases proposed by Nicor Gas and Ameren Illinois, slowing the speed of rising energy bills for customers in much of the state. Instead of approving the full \$314 million requested by Nicor and \$129 million requested by Ameren, the ICC cut 47% and 43% from the requests, respectively. As a result, the ICC approved a rate increase of \$168 million for Nicor and \$73 million for Ameren Illinois.... For more info go to
