

Consigned Fuel Program

Share Bulk Fuel Savings across Multiple Entities

The Mansfield Consigned Fuel Program enables organizations to gain bulk fuel purchase discounts as a single entity while conveniently tracking purchase transactions across multiple entities, users, platforms and fueling modes. The program helps organizations maximize working capital, control on-site fueling, and fully automate inventory and management to relieve administrative burdens.

HOW IT WORKS

Mansfield buys the initial existing inventory in each consigned tank. Then, with remote access to card readers and tank gauges, the program tracks daily inventory levels and tank compliance. The tanks can be networked for access by all sharing entities or restricted to only a limited number.

Mansfield then bills each entity separately as they fuel from the consigned tank. This process is automated and electronically delivered with detail of each transaction supporting the invoice. It is streamlined, automated and helps to accurately account for usage across multiple entities.

The Consigned Fuel Program provides:

- ✓ Pay as you pump capabilities
- ✓ Entity, site and driver-level reporting
- ✓ Flexible invoice and reporting permissions
- ✓ Automatic agency-specific billing and collections
- ✓ Automatic accruals and cost distribution
- ✓ Utilization of fuel system assets for multiple cost centers
- ✓ Monthly tank reconciliation

Consigned Fuel Program

Reduce Cost, Increase Control, Automate Billing

SITUATION

A government agency with 265 billing agencies across 110 locations, 200 tanks, 16,000 vehicles and 19,000

drivers wanted to gain control over its scattered fuel usage, inventory and billing.

SOLUTION

Mansfield recommended a Consigned Fuel Program to centralize procurement while tracking usage. The agency was able to utilize their card reader units and implemented a mix of inventory gauges with customized proprietary cards all managed via Mansfield's FuelNet solution.

BENEFITS

The agency saves costs in fuel purchasing from indexed pricing and with the multiple user, online interface, they are able to perform tank reconciliation, capture program fees, and enjoy fully automated and managed inventory.

How to Get Started

Let Mansfield design a Consigned Fuel Program tailored for your savings goals and organizational needs. We will perform a consultation to design a best practice program that gives you significant bulk fuel savings and accountability across multiple entities.
