

Emergency Response Program

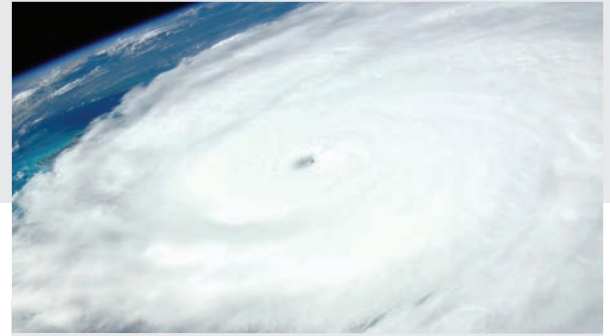

Ensure Business Continuity with
Guaranteed Fuel Supply

When a natural disaster or emergency occurs, local fuel supply may be cut off or limited. This can cause fuel prices to skyrocket while lines grow at retail gas stations. If your organization depends on keeping vehicles or stationery generators running, these disruptions will limit your ability to operate efficiently.

GUARANTEED SUPPLY

No matter where an emergency event occurs, lower your business risk and ensure fuel is available when and where you need it. Mansfield Energy's Emergency Response Fuel Program is designed for organizations with little margin for downtime. Whether you need backyard, mobile or generator fueling for your facilities or vehicles, Mansfield's extensive delivery network and fuel supply points ensure your business will be operational.

Flexible Program Components

Mansfield Energy provides a broad range of options to meet your specific needs.

Fuel storage tanks - Mansfield delivers temporary fuel storage tanks for your offices, equipment yards and warehouses.

Dedicated fuel trucks - When everyone else is scrambling to find fuel, Mansfield dispatches a team of mobile fueling trucks to fill your company and employee vehicles, temporary fuel storage tanks and emergency backup generators.

Retail fleet cards - Arm employees with fleet cards for purchasing retail fuel before and after an emergency event.

Tank and generator maintenance - Mansfield experts provide annual fuel storage tank and fuel quality testing to ensure your fuel is always ready.
