IN THE NEWS

G7 Plans To Back New Natural Gas Investments

With global energy markets upended, the G7 group of the world's most industrialized nations is considering endorsing new upstream investment in natural gas despite climate concerns, a draft document seen by Reuters showed on Thursday. The energy and climate change ministers of the G7 members—Canada, France, Germany, Italy, Japan, the UK, and the U.S.—are holding a summit in Japan next week, at which they are expected to discuss ways to reduce emissions in the face of more pressing energy security issues. According to the draft document, the ministers will say that new upstream investment in natural gas supply will be needed to address energy security after the Russian invasion of Ukraine. "In this context, in this particular contingency, we recognize the need for necessary upstream investments in LNG (liquefied... For more info go to <https://bit.ly/3UoiNpH>

US weekly LNG exports climb to 28 cargoes

The EIA said in its weekly natural gas report that 28 LNG carriers departed the US plants between March 30 and April 5, eight shipments more when compared to the week before. Also, the total capacity of LNG vessels carrying these cargoes is 105 Bcf, it said. Overall weekly average natural gas deliveries to US LNG export terminals increased by 6.9 percent (0.9 Bcf/d) week over week to average 13.9 Bcf/d this report week, according to data from S&P Global Commodity Insights. Natural gas deliveries to terminals in South Louisiana increased by 3.2 percent (0.3 Bcf/d) to 8.4 Bcf/d, while deliveries to terminals in South Texas increased by 16.5 percent (0.6 Bcf/d) to 4.3 Bcf/d. The agency said that natural gas deliveries to terminals outside the Gulf Coast were essentially unchanged. Cheniere's ... For more info go to <https://bit.ly/4OYLtYK>

Spanish LNG imports, reloads climb in March

LNG imports rose by 12.2 percent to about 29.9 TWh in March and accounted for 79 percent of the total gas imports. In February, LNG imports reached some 21.4 TWh. Including pipeline imports from Algeria and France, gas imports to Spain reached about 37.9 TWh last month, a rise from some 37.6 TWh in March last year, Enagas said in its monthly report. Moreover, gas demand in March dropped slightly by 1.7 percent year-on-year to 36.3 TWh. Demand for power generation declined by 17 percent year-on-year to 6.3 TWh last month, while conventional demand dropped by 15.8 percent to 22.2 TWh, the LNG terminal operator said. Enagas operates a large network of gas pipelines and has four LNG import plants in Barcelona, Huelva, Cartagena, and Gijon. It also owns 50 percent of the BBG regasification plan...
