## IN THE NEWS

## U.S. natgas up 3% to 10-week high on big storage...

U.S. natural gas futures rose about 3% to a 10-week high on Thursday on a bigger than expected storage draw, a preliminary decline in output and forecasts for more power generation and liquefied natural gas (LNG) export demand for gas over the next two weeks. The U.S. Energy Information Administration (EIA) said utilities pulled 33 billion cubic feet (bcf) of gas from storage during the week ended April 1. Analysts said storage withdrawal was due to cold weather last week and was likely the last decrease of the winter heating season. That was higher than the 26-bcf withdrawal analysts forecast in a Reuters poll and compares with an increase of 19 bcf in the same week last year and a five-year (2017-2021) average increase of 8 bcf. Last week's decline cut stockpiles to 1.382 trillion cubic feet (tcf), or 17.1% below... For more info go to <https://bit.ly/3rjyUHN>

## NYMEX Henry Hub May remains near 13-year highs on...

After settling at its highest price in over a decade on April 7, the NYMEX Henry Hub prompt-month contract largely kept its gains in April 8 trading, as a widening storage deficit and the strength of natural gas exports raised supply concerns. NYMEX Henry Hub May settled at \$6.278/MMBtu April 8, just 8.1 cents lower than its prior-day settlement of \$6.359/MMBtu on April 7, preliminary settlement data from CME Group shows. The April 7 daily settlement was the highest the prompt-month contract has reached since Dec. 2, 2008, according to data from S&P Global Commodity Insights. Even with the April 8 dip, the May contract has gained more than 70 cents since becoming the front month contract. Late spring price rallies ... For more info go to <https://bit.ly/304pidy>

## US shale gas, LNG firms meet European countries over...

At least a dozen U.S. shale gas executives on Wednesday held discussions with European energy officials on increasing U.S. fuel supplies to Europe as part of efforts to replace Russian imports. At the meetings in Houston, foreign affairs, economic ministers and commercial buyers discussed how to lower their imports of Russian oil, coal and liquefied natural gas following Moscow's invasion of Ukraine, trade group officials said. The European Union plans to cut its reliance on Russian gas by two-thirds this year. Delegations from Latvia and Estonia, diplomats from Bulgaria, Estonia, France, Germany, Hungary, Latvia, and the United Kingdom toured the Golden Pass LNG export project in Sabine Pass, Texas, and later met in Houston with....
