**New York City bans natural gas in new buildings**

The New York City Council voted on Wednesday to ban the use of natural gas in new buildings, following in the footsteps of dozens of smaller U.S. cities seeking to shift from fossil fuels to cleaner forms of energy. New buildings in the biggest U.S. city with 8.8 million residents will have to use electricity for heat and cooking, according to the council vote that was streamed on its website. "The bill to ban the use of gas in new buildings will (help) us to transition to a greener future and (reach) carbon neutrality by the year 2050," said City Council Speaker Corey Johnson, noting "We are in a climate crisis and must take all necessary steps to fight climate change and protect our city." In the near-term, the new law will do little to reduce carbon emissions in the Big Apple, as numerous older buildings will n... For more info go to <https://reut.rs/3s8T7RN>

**Energy Stocks Set To Break Out In 2022**

The energy sector has recovered this year, driven by the reopening of economies and the subsequent rebound in oil demand. Despite the pullback in oil prices and energy stocks in recent weeks, energy has been the top-performing S&P 500 sector this year. The energy sector has room to rise even more next year, as energy demand is set to continue rebounding. The low valuations of many energy stocks and the handsome yields could make the sector more attractive for investors in 2022, analysts say. Energy is also one of the industries benefiting from the reopening of economies, strong consumer spending, and economic growth. Even with intermittent scares of new COVID variants, such as Omicron in recent weeks, analysts do not expect mass lockdowns globally as in the spring of 2020 and do not see—c... **Banning US LNG exports would be 'highly destabilising' says IHS Markit**

Curtailling US exports of LNG has recently been raised as an option to insulate US consumers from rising gas and power costs around the globe. However, an imposed disruption of LNG supply at a time of extreme stress in global gas markets would have a highly destabilising effect both politically and commercially. Such a move risks higher prices for US consumers while undermining US interests and emissions reduction goals abroad, according to a new analysis by IHS Markit. "When markets are tight what is required is an assurance of steady, secure, reliable supply, and reliability for the agreements and relationships with other countries underwriting this supply," said Daniel Yergin, vice chairman, IHS Markit and author of The New Map. "Proposals to limit or redirect supply only exacerbate tensions, add to uncertainty ... For more info go to <https://bit.ly/3yziXQc>

## WEEKLY GAS IN UNDERGROUND STORAGE WITH 5-YR RANGE

for week ending December 10, 2021 | Released: December 16, 2021 | Next Release: December 23, 2021

### EIA Weekly Storage Actual and Surveys for December 10, 2021

Released December 16, 2021

Range	-88 to -99
S&P Platts	-88
NGI	-89
Investing.com	-88

## UNDERGROUND WORKING NAT GAS STORAGE AS OF 12/03/2021

### Total Working Gas In Storage

**-3417 BCF**

- 88 BCF (LAST WEEK)
- 326 BCF (LAST YEAR)
- 64 BCF (5-YEAR AVG)

### U.S. Natural Gas Supply Gas Week 11/11 - 11/17

Average Daily Values (BCF/D):

<u>Last Year (BCF/d)</u>	
Dry Production -	90.2
Total Supply -	95.1
<u>Last Week (BCF/d)</u>	
Dry Production -	95.9
Total Supply -	101.0

[Next Report: December 02]

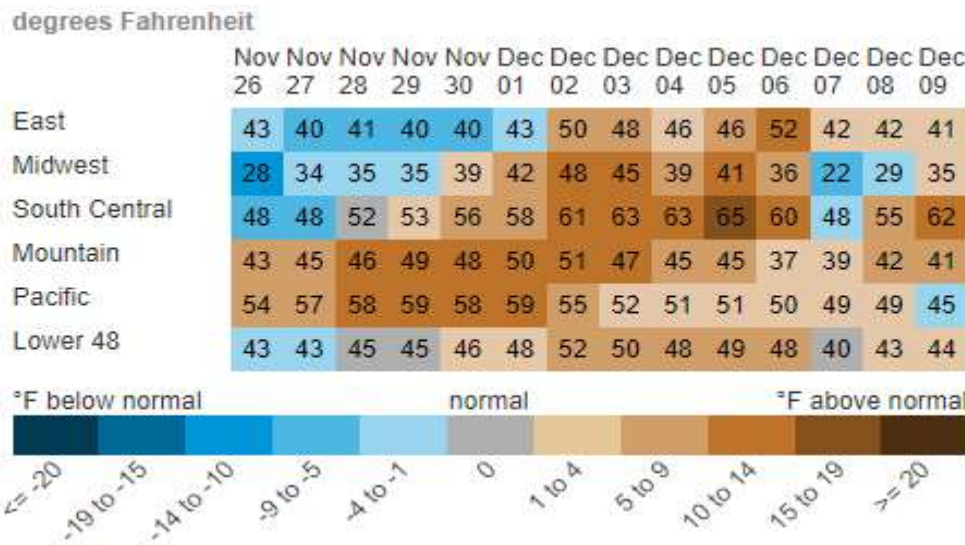

### U.S. Natural Gas Supply Gas Week -

Average Daily Values (BCF/D):

<u>Last Year (BCF/d)</u>	
Dry Production -	25.8
Total Supply -	95.7
<u>Last Week (BCF/d)</u>	
Dry Production -	28.8
Total Supply -	100.0

[Next Report: December 02]
