**Spain Boosts LNG Port Capabilities But Russian Gas Is In The Mix**

Spanish natural gas grid operator Enagas has said that the volume of liquefied natural gas (LNG) vessels loaded in Spain and setting sail for Europe doubled in 2022, year-on-year, with a total of 250 ships loading LNG in Spain. According to Enagas Chief Executive Arturo Gonzalo Aizpiri, "Our plants are contributing very significantly to the energy security of other nations and from the Barcelona plant, especially for Italy," Enagas CEO Arturo Aizpiri told reporters, as cited by Reuters. The announcement was made on Thursday at the unveiling of a new platform at Enagas' Barcelona port regasification plant, which is expected to lead to an additional uptick in LNG traffic to Europe. Spain boasts six LNG terminals to supply Europe, with a seventh set to become operational in a matter of weeks. While Europe LNG loading... For more info go to <https://bit.ly/3XdtGdl>

**U.S. natural gas consumption reached record daily high in late Decemb**

On December 23, 2022, natural gas consumption in the U.S. Lower 48 states reached a daily record high of 141.0 billion cubic feet (Bcf), according to estimates from S&P Global Commodity Insights. The previous record was 137.4 Bcf, set on January 1, 2018. Below-normal temperatures in mid- to late December increased demand for natural gas used for residential and commercial space heating and electric power generation. At the same time, natural gas production quickly fell because of mechanical issues caused by the cold temperatures. From December 21 through December 26, 2022, a winter storm moved across North America, bringing blizzards, high winds, and extremely cold temperatures to a large portion of the United States. Increased demand for space heating in both the residential and commercial... For more info go to <https://bit.ly/3x3uGGw>

**As Texas hit with freezing temps, natural gas drives Texas energy grid**

As Texas continues to grapple with winter conditions and about 1% of Texans lost power due to icy conditions, statewide, the power, heat, lights and water are on, largely fueled by the Texas natural gas industry. According to ERCOT, the state's regulatory agency that manages the power grid, natural gas is keeping the power on in Texas. It's Fuel Mix report, which breaks down energy generation by resource type, shows the majority of energy produced comes from natural gas. At midnight Feb. 1, for example, solar and hydro accounted for 0% of energy generated. Wind generated 7%, coal and lignate accounted for 19%; nuclear, 9%. The majority of electricity generated came from natural gas: 66%.... For more info go to <https://bit.ly/3YbMQC1>

# NATURAL GAS NEWS

## WEEKLY GAS IN UNDERGROUND STORAGE WITH 5-YR RANGE

for week ending January 27, 2023 | Released: February 02, 2023 | Next Release: February 09, 2023

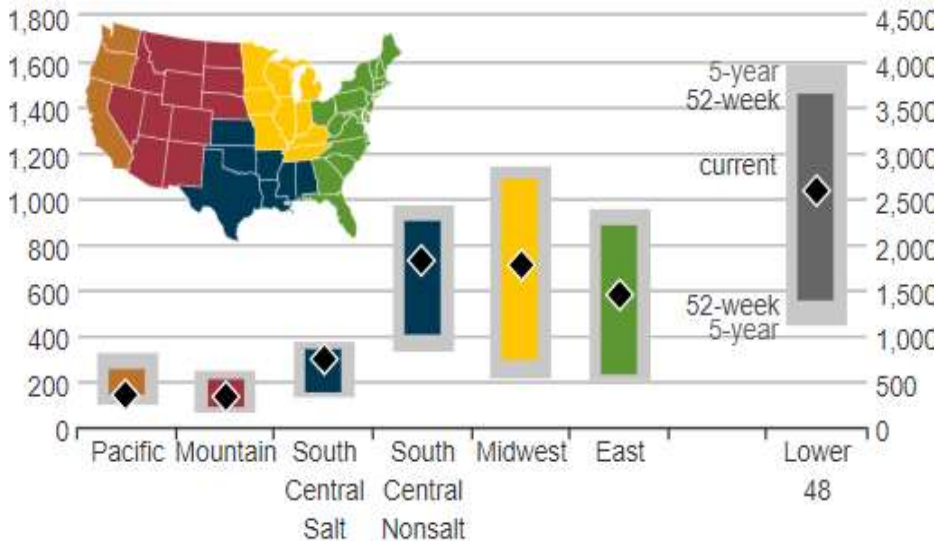

### EIA Weekly Storage Actual and Surveys for

January 27, 2023

Released February 02, 2023

Range	-146 to -181
S&P Global	-84
FX Street	-193
Investing.com	-142

## UNDERGROUND WORKING NAT GAS STORAGE AS OF 01/13/2023

### Total Working Gas In Storage

**2583 BCF**

-151 BCF (LAST WEEK)  
222 BCF (LAST YEAR)  
163 BCF (5-YEAR AVG)

### U.S. Natural Gas Supply

#### Gas Week -

Average Daily Values (BCF/D):

Last Year (BCF/d)

Dry Production - 95.1

Total Supply - 102.5

Last Week (BCF/d)

Dry Production - 100.0

Total Supply - 105.4

[Next Report: February 09]

### U.S. Natural Gas Demand

#### Gas Week -

Average Daily Values (BCF/D):

Last Year (BCF/d)

Power - 31.7

Total Demand - 134.3

Last Week (BCF/d)

Power - 31.1

Total Demand - 118.8
